

## Inductance Decade Box

Model:LDB6

Inductance decade box

Feature: High accuracy to 0.1%

The boxes can quickly and accurately simulate inductance for quickly testing the accuracy of multimeters and other instruments that directly measure inductance. The Inductance Decade Box is made for commercial applications.

### Feature

- .High accuracy to 0.1%
- .Economical, high performance high resistance decade for all laboratory
- .Plastic cabinet for better insulation

Decade	Range	Max- Current
1.	0.01 mH x 10	200mA
2.	0.1 mH x 10	200mA
3.	1 mH x 10	200mA
4.	10 mH x 10	200mA
5.	100 mH x 10	100mA
6.	1 H x 10	50mA
